

Powder dosing machines - customized solutions

PFW 15 with bucket conveyor in double line

The above shown customized dosing machine for powder PFW 15 has in total 15 dosing stations, thereof

- 5 for Big-Bag-charging,
- 8 for paper sack charging and
- 2 for hand dosing

The weighing process is integrated in the bucket conveyor with 2 buckets. The bucket conveyor is construed for ascending slope.

The use of this special bucket conveyor allows a lower installation height.

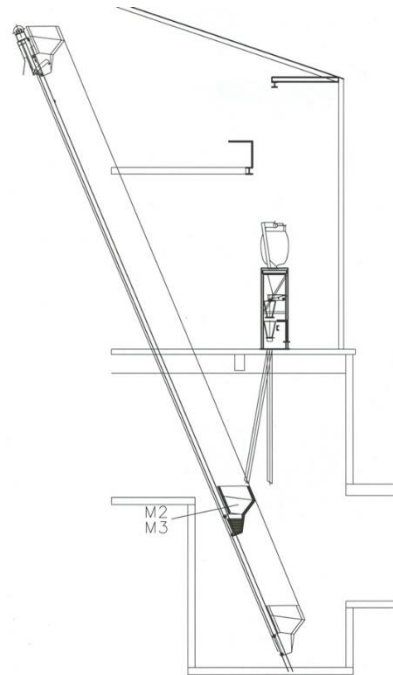

Solutions with double line available

Subject to change without prior notice.

Powder dosing machines - customized solutions
